Norman Zadeh Miramonte Class of 1967

with Joan Rivers

He claims he was very unpopular in high school and never went to a high school dance.

Dropped out of Miramonte and went to UC Berkeley.

Received a BA in math from UC Berkeley and a Ph.D. in Operations Research.

After receiving his Ph.D., he wrote “Winning Poker Systems,” which was published in 1974.

He taught as a professor at Stanford, UC Irvine, and UCLA but most of his income came from backgammon, poker, and betting on sports.

Started to manage hedge funds, and in 1996, created Perfect 10 magazine.

He has written three other books:

The Rise and Fall of Perfect 10, Hold’Em Poker Super Strategy, and Fox News: The Enemy Within.

His father, Lotfi Zadeh, became famous for creating “Fuzzy Logic.”
